- Refinement: Adjustments are made to achieve desired chemical composition.

Advantages:

- High efficiency and large-scale production.
- Lower cost per ton.

2. Electric Arc Furnace (EAF)

This method is more flexible and is often used for recycling scrap steel.

Steps involved:

- Scrap Collection: Steel scrap or direct reduced iron (DRI) is gathered.
- Melting: An electric arc generates intense heat to melt the scrap.
- Refining: The molten steel is refined by adding alloying elements.
- Casting: The steel is cast into molds or continuous cast into slabs.

Advantages:

- Environmentally friendly due to recycling.
- Suitable for producing specialty steels and small batches.

Steel Types and Their Key Characteristics

The diversity in steel types reflects the importance of controlling the "key" elements and production methods.

Carbon Steels
