Question 3: How can you convert a data range into an Excel table?

Answer: Select the data range, then go to the Insert tab and click on Table. Ensure the "My table has headers" checkbox is selected if applicable, and click OK.

Question 4: How do you apply conditional formatting to highlight duplicate values?

Answer: Select the data range, go to the Home tab, click Conditional Formatting > Highlight Cells Rules > Duplicate Values, choose the formatting style, and click OK.
