- The position of the weld symbol in relation to the reference line indicates whether the weld is to be made on the arrow side or the other side of the joint.

Arrow Side and Non-Arrow Side

- The arrow side (or "side A") is where the arrow points.
- The other side (or "side B") is opposite the arrow.
- Symbols placed below the reference line indicate welds on the arrow side; symbols above indicate welds on the non-arrow side.

Types of Weld Symbols as per BS EN 22553

The standard defines various basic weld types, each represented by specific graphical symbols.

Common Basic Weld Symbols

- Fillet Weld: A triangular symbol indicating a weld that joins two surfaces at a right angle.
